

Rapid Entry System

KNOX-BOX®

The Falcon Fire Protection District requires a locking KNOX key box on all commercial buildings as defined by the Fire Code Official, or where immediate access is necessary for life-saving or fire fighting purposes per the 2003 International Fire Protection District, Section 506.1 as Amended.

LOCATION: The KNOX key box shall be located at the “main front entrance” of the building between six (6) and seven (7) feet about the finished grade.

Multi-Tenant Buildings – A KNOX box may be installed at each tenant entrance *or* a single box may be installed at the far right side of the building as you are looking at the store fronts, between six (6) and seven (7) feet about the finished grade. If this method is used, please ensure you order a key box large enough to accommodate two sets of keys from each tenant space.

DECALS: The KNOX decal shall be installed at the main front entrance or as required by the Fire Code Official.

BUILDING KEYS: The box shall contain at least two (2) sets of labeled keys, including but not limited to: keys for access into and through the premises, keys to any secured fire protection system, and elevator keys.

MAINTENANCE: The Operator of the building shall immediately notify the Fire Code Official and provide new keys when a lock is changed or rekeyed.

GATE/BARRIER LOCKS: Approved KNOX locks shall be installed in gates or similar barriers when required by the Fire Code Official per the 2003 International Fire Code, Section 506.1.1 as Amended.

LOCKING FIRE DEPARTMENT CONNECTION (FDC) CAPS: Fire Department Connections shall be secured with KNOX FDC Caps in accordance with the 2003 International Fire Code, Section 912.3.1 as Amended.
